October 29, 8:30am-4:00pm
Introducing Green Infrastructure

NOAA Office for Coastal Management
University of Hawai'i Sea Grant College Program

Homer A. Maxey International Trade Resource Center
Hawaii Foreign-Trade Zone, No.9
521 Ala Moana Blvd, Pier 2
Honolulu, HI 96813

Agenda

"Green Infrastructure" incorporates the natural environment and constructed systems that mimic natural processes in an integrated network that benefits nature and people.

Session Objectives:
- Participants recognize green infrastructure terms and concepts
- Participants understand the ecological, economic, and societal benefits of green infrastructure
- Participants understand the wide variety of contexts and scales of approaches referred to as "green infrastructure"
- Participants identify new or existing planning processes suitable for integrating green infrastructure concepts and techniques
- Participants identify local green infrastructure activities and experts with additional information and resources
